

High School Social Studies

World Geography

Traveling the globe has never been more interactive. World Geography will take students across the U.S. and to the very ends of the earth to learn about the physical geography of each region, its culture and society, and its economics and politics. By looking at the history and implications for the future, students will develop their critical thinking and problem solving skill while getting a comprehensive view of the world in which they live. The course units include text-based lessons, on and off-computer exercises, special projects, learning games, quizzes, and tests that appeal to today's digital generation and help teachers to evaluate progress and mastery of the materials. World Geography enriches the educational experience for homeschool students and sparks a passion for learning.

Throughout the course, students will explore the following topics:

- Geography Defined
- Humans and Their Environment
- North America
- Central America, South America, and the Caribbean
- Oceania, Australasia, and Antarctica
- Europe and the Balkans
- Sub-Saharan Africa
- North Africa and Southwest Asia
- Central, South, East, and Southeast Asia

World History

Students in this technology-rich history course will gain a broad perspective on how human society has been affected by and will continue to be influenced by the past as they make their way through time. Lessons examine a diverse mix of topics including the origin of man and ancient civilizations, the Roman Empire, the rise of Christianity, the Middle Ages, the Renaissance, the Mongols, the Industrial Age, and the role of the U.S. throughout history. The course units include text-based lessons, on and off-computer exercises, special projects, learning games, quizzes, and tests that appeal to today's digital generation and help teachers to

evaluate progress and mastery of the materials. World History enriches the educational experience for homeschool students and sparks a passion for learning.

Throughout the course, students will explore the following topics:

- The Beginnings of Human Society
- Ancient Civilizations
- The Medieval World
- Renaissance and Reformation
- Growth of World Empires
- The Age of Revolution
